WASHINGTON HOSPITAL CENTER

GEORGE HYMAN MEM.RESEARCH BLDG

WASHINGTON, DC 20010

Type: ROUTINE INSPECTION

Date: Jul-01-2008

2.31 (d) (1) (ix)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The IACUC shall determine that the proposed activities or significant changes in ongoing activities that involve surgery include appropriate provision for post-operative care of the animals in accordance with established veterinary medical practices.

*** Protocol 2006-027: The protocol states that post-operative care would include the administration of 40mg of oral aspirin daily for the duration of the study. Records indicate the animals are not eating the aspirin in pill form and no efforts have been made to ensure the animals receive the aspirin. Post-operative care must be provided in accordance with the approved protocol to ensure the health of the animals and sound research. An alternative method of administration of the aspirin must be identified to ensure the animals receive appropriate post operative care in accordance with established veterinary practices and to prevent unnecessary duplication of experiments.
Correct by June 3, 2008.
